

To Industrialize Construction

Sany Construction, established in 2016 as a subsidiary of SANY Group, is dedicated to “Becoming A Hard-tech Company in Intelligent Construction” .

Building on SANY’ s strengths as one of the “Big 3 in Construction Machinery” and its industrial IoT capabilities, Sany Construction focuses on prefabricated concrete buildings.

Through fundamental research and development, rigorous validation, and project engineering practice, the Sany Prefabricated Construction System (SPCS) has been brought to life.Sany Construction aim to make mass construction structurally safe, cost-competitive, low carbon, intelligent, high quality, quick to build, and resource-efficient.

Offerings include SPCS structural technology

prefabricated component production lines

autoclaved aerated concrete production lines

Special Transport Vehicles for Prefabricated Members

mobile crushing and recycling
